HydraX™ Angled Patch Panel
1U 24ports Unloaded Patch Panel

HydraX™ innovative angled copper modular data patch panel elevates aesthetics of rack cabling. Perfecting the Art of Cabling!

Features and Benefits

Compatiable with HydraX™ data modular jacks.

Allow cable patching without the need of horizontal top or bottom cable management panels, freeing valuable rack space for equipment and such arrangement improves air circulation flow within the rack.

Standard 1U 19" rack-mountable panel with label cover and holder.

Restraining bar allowing proper cable management, taking away lateral stress from installed cables and preventing kinks in the cables. Effectively maintaining the reliability of the cabling system.

24 ports comes with sequential numbering placement for ease with management and identification.

Panel for shielding cabling system available.
